## Projects

### TheyNeedUs

Aim of this project was to built fund collection site for covid affected children. In this site,payment gateway is integrated using stripe API.

*Bootstrap5,Stripe API,node js ,express.*

### Student management

Primary aim of developing this project was to built a system capable of managing student data,with better user experience. This GUI application is capable of adding new data,updating data,deleting data and displaying data.

*Python, tkinter, MySQL-connector,MySQL*

### Portfolio site

This website is built to demonstrate my work and background. Developing this project gave me better understanding of grid and flex in css.

*HTML5,CSS3*

## Co-curricular and extra curricular activities

### Volunteer at TAHAAN (Nov 2019-now)

As part of urban gardening team at TAHAAN,I contribute towards successful conduction of desired activities and once I also hosted online workshop on urban gardening along with team members.

### Won full scholarship for Udacity nano degree

I was among 1600 people out of 15000 to won the scholarship. To get scholarship there was 2 phases.

### Participated in Nexus front end hackathon

I had participated solo in this competition.In this,I had developed a front end site using HTML5, CSS and little JS with aim of introducing beauty of Nashik my home town to non residents of Nashik.

Visit the site: **knowNashik**

### Outreach coordinator at Scholarship Track(Aug 2021-now)

As outreach coordinator, I reach out to people and ask them to share their experience in the form of google form so that aspirant will get to learn from their experience.
